The Journal of Religion in 1922

Why a Publication of This Kind?

Religion is one of the strongest forces in human life. How much do we really know about it? For the most part its interpretation has been left largely to those who are primarily concerned to defend and strengthen ecclesiasticism. Theologies we have in abundance. But we know all too little about religion as form of individual and social life.

The Journal of Religion exists to promote a sympathetic understanding of religion. Eminent scholars in the fields of biblical interpretation, history of religions, psychology, sociology, philosophy of religion, and theology, as well as leading pastors, missionaries, and educators, co-operate in this task of interpretation.

If you are interested in any phase of religion, you need the stimulus and information furnished by this *Journal*.

Features of the Journal of Religion for 1922

Suggestive articles dealing with the actual evolution of religion in our day. We are familiar with the interesting development in which Christianity became the bearer of Hellenistic culture. Today in the Orient religious revivals are intimately bound up with political and social unrest. In America religion is boldly seeking entrance into the social and industrial ferment of today.

The exploration of psychological and social aspects of religion. Psychologists, historians, and sociologists are now dealing seriously with religion. The *Journal* furnishes a medium for the scientific investigation of religious phenomena by all who have a real contribution.

Surveys of present aims and interests in the study of religion. A series of articles is planned which will take an inventory of resources and achievements in different fields.

Reports of significant experiments in the organization of religious activities. Our day is especially rich in such experiments. What can we learn from them?

Prompt information concerning new publications in the field of religion. Each issue of the *Journal* will contain a classified and carefully annotated list of the latest books. The more important of these will be reviewed at length by competent scholars.

An editor's page. Here the significance of the topics treated in each issue of the *Journal* will be interpreted, and attention will be called to important problems and achievements.

The January Issue of the Journal

will contain the following articles:

"The Contribution of the Open Forum to Democracy in Religion," by GEORGE W. COLEMAN, the father of the Forum movement.

"Glimpses of the Religious Life of New Japan," by PROFESSOR KENNETH SAUNDERS, for years a resident in the Orient.

"The Mission of Reform Judaism," by SAMUEL S. COHEN, an influential rabbi.

"What Are the Fundamentals of Christianity?" by PROFESSOR C. R. MOEHLMAN, who has the chair of Church History in Rochester Theological Seminary.

"Christian Division: a Prior Claim," by DR. PAUL HUTCHINSON, formerly a missionary in China.

RUSSIAN DISSENTERS

By **FREDERICK C. CONYBEARE**

Honorary Fellow, University College, Oxford

Among the many facts in Russia which are still so little known that it is impossible to say whether they had or had not any effect in producing the Revolution, is the existence of the Russian dissenters. To most of us their history, numbers, and opinions are quite unknown and therefore it is impossible to form any reasonable opinion as to whether they helped to produce the Revolution, and still less whether, now that the Revolution is here, they will come into their own in the religious and political life of Russia.

Mr. Conybeare's "Russian Dissenters," published by the Harvard University Press, is almost the first scientific attempt to tell the story of Russian dissent. He traces it from the seventeenth century down to the eve of the Revolution by the help of Russian books which are mostly inaccessible to European and American readers. No one who is interested in the past or future of Russia can afford to neglect this book, which, though not intended to illustrate the rise of Sovietism, explains more things than are elucidated by most books written especially for that purpose.

Belief in God and Immortality

A Psychological, Anthropological and Statistical Study

By **JAMES H. LEUBA**

*Professor of Psychology and Pedagogy in Bryn Mawr College
Author of "A Psychological Study of Religion;
Its Origin, Function and Future"*

Cloth, price \$2.50

Facts, not speculations, are the basis of this book. It seems scarcely necessary to mention that the author is an authoritative psychologist, familiar with recent anthropological literature and philosophical discussions on these topics.

Life Eternal

Past—Present—Future

By **BARTHELEMY PROSPER ENFANTIN**

Translated by Fred Rothwell. Cloth, price \$1.60

Enfantin, born in 1796, was one of the founders of French Socialism.

Enfantin regarded himself as not only the bearer of a heavenly message but as the word of God incarnate. He displayed both the strength and weakness of an enthusiast. His influence over the finest intellects of his age was wonderful. The new religion spread all over Europe until in 1832 the halls of the new sect were closed by the government. Enfantin was arrested, tried and found guilty and sentenced to imprisonment. This proved a deathblow to the society.

The present volume in an abridged form represents the fruit of Enfantin's ripest thought on purely philosophical and moral as apart from political subjects.

Evolution, Genetics, and Eugenics

By HORATIO H. NEWMAN

*Professor of Zoölogy
The University of Chicago*

Most thinking people today are more or less interested in evolution and eugenics. You want to speak authoritatively on these subjects. This volume by Professor Newman will be found of unusual significance as it is written in an easy reading style and contains excerpts from such well-known writers as Darwin, Wallace, Romanes, DeVries, LeConte, Weismann, Morgan, Castle, Lull, Guyer, Popenoe, Johnson, Babcock, Clausen, Walter, Saleeby, Shull, Tayler, Downing, and Thomson.

This book has been prepared to meet a specific demand for an account of the various phases of evolutionary biology condensed within the scope of one volume of moderate size.

The value of the book is enhanced by a wise use of illustrations.
